

Think

Synchronous

React

Redux

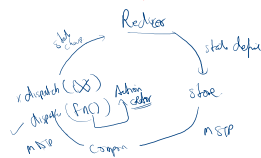

Asynchronous

think

→ is a function wrapped inside of a function

think → null case

dispatch (if type of 3) interesting

Async work in redux → think → null case

User
↳ unsubscribe load

loading ...
even unsubscribe → display

React

pure function

→ Redux easy 1g 1g 1g

→ Redux

→ returned by func is always same for same input

(10, 20) → 30

add (a, b) → 30
add (10, 20) → 30
random (10, 20) → 21
random (10, 20) → 21

external world
function random (a, b) {
 return Math.random * (b - a) + a
}
